Professional Summary

Entry-level cybersecurity candidate with hands-on project experience in security monitoring and log analysis using Splunk. Skilled in analyzing authentication activity, identifying potential brute-force patterns, investigating suspicious source IP activity, and creating dashboards and security alerts. Foundational knowledge of networking, Windows and Linux systems, cloud fundamentals, and cybersecurity concepts. Seeking entry-level opportunities across cybersecurity, security operations, security monitoring, and related roles.

Technical Skills

Cybersecurity: Security Monitoring, Log Analysis, Threat Detection, Authentication Analysis

SIEM: Splunk Enterprise, SPL

Network Security: Wireshark, TCP/IP, DNS, DHCP, Ports & Protocols

Operating Systems: Windows, Linux

Programming: Python

Cloud: Microsoft Azure Fundamentals

Projects

SSH Log Analysis and Threat Detection

Splunk Enterprise, SPL, JSON

- Ingested SSH authentication logs into Splunk Enterprise and analyzed authentication activity using SPL.
- Developed SPL queries using "stats" and "timechart" to analyze failed/successful logins, source IP activity, and authentication patterns.
- Identified potential brute-force activity through repeated failed authentication attempts from source IPs.
- Analyzed unauthenticated SSH connections and investigated suspicious authentication activity.
- Created Splunk Dashboard Studio visualizations and configured alerts for potential brute-force activity.
